SKILLS

Web Development:	HTML, CSS, JavaScript, React, Redux, WordPress
Database Technologies:	MySQL, Oracle
Tools:	Visual Studio Code, Git, Microsoft Office, Postman

PROJECTS

IT-Logger (React) (2021) https://wvitlogger.netlify.app/
- An application that fetches and stores data in an API for the purpose of effectively logging activity
- Implements Redux to effectively control app level state
- Ability to get, add, delete, and update 'Log' and 'Tech' states

GitHub Finder (React) (2021) https://wvgithubfinder.netlify.app/
- An application that fetches queried data that is entered in the search bar from the GitHub API
- Utilizes Context API to effectively control app level state
- User data is retrieved and then destructured to display their name, location, bio, website, and recent projects

Personal Portfolio Page (React) (2021) https://williamvuong.ca/
- Personal website to display information about myself, my skills, and projects
- Utilizes functional components hooks such as 'useState' and 'useEffect' and incorporates 'BrowserRouter' to route the Home, About, and Projects page
- CSS conditions are implemented to incorporate meaningful animations and an intuitive page design that is desktop and mobile friendly

Movie Database (React) (2021) https://wvmoviedb.netlify.app/
- An application that fetches queried data that is entered in the search bar from the API: https://api.themoviedb.org
- Data from movies with matching queries are destructured and displayed in flexboxes when a hover event occurs

Business Page (WordPress) (2020) www.studio6ix.ca
- Utilizes WordPress tools to create an intuitive website design that is easy for the user to navigate to view the services offered, staff members, and contact information of the business
- Utilizes custom WordPress plugins such as Google Maps and slide show to help enhance a user's experience

EDUCATION

Computer Programming, Ontario College Diploma Program
Seneca College | North York, ON | May 2017 – May 2019
- Demonstrated the ability to implement different coding languages to complete various complex assignments
- Notable Courses: Web Programming, Database Design and SQL, Requirement Gathering Using Object Oriented Models, Analysis and Design, Object Oriented Programming

WORK EXPERIENCE

Manager
Studio6ix | Vaughan, ON | April 2018 – Present
- Establish trust and provide quality services which lead to creating strong client relationships
- Organize and maintain schedule for myself and other staff members to accommodate clients in an orderly manner that ensured punctuality without compromising quality
